DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ojima (6,352,133).

Ojima discloses an operation means box device 21 that is disposed by a side of an operator seat 7; in which an operation means box that has operation means on an upper surface is freely movably installed in a forward-rearward direction relative to the operator seat; and which comprises locking means 32 for fixing the operation means box at a prescribed position, wherein an unlocking handle 29 for unlocking the locking means is provided on a surface of the operation means box other than the upper surface thereof. A fixed handle 33 that faces against the unlocking handle is fixedly installed to the operation means box. The fixed handle 33 is fixedly installed in a region above the unlocking handle 29 that can be moved in a vertical direction. The locking means comprises an engaging member 36 that is fixedly installed to a support 22 that freely movably supports the operation means box, a locking member 41 that is installed in the operation means box, and is engaged with and disengaged from the engaging member, a biasing member 42 that biases the locking member to engage it with the engaging member, and a rocking lever 29 that has the unlocking handle at one end, and is pivotally supported in the operation means box to enable the locking member to be moved and operated. A fixed handle 33 that faces against the unlocking handle 29 is fixedly installed to the operation means box. The fixed handle is fixedly installed in a region above the unlocking handle that can be moved in a vertical direction, see figures 5 and 8.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ojima (6,352,133).

Ojima discloses the claimed invention except for the fixed handle disposed on an outside surface of the operation means box together with the unlocking handle. It would have been obvious to one having ordinary skill in the art at the time the invention was made to the fixed handle disposed on an outside surface, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.
